

Alfido Tech Sales Performance Analysis Summary

Objective

Analyze sales performance across regions, categories, products, and time using the sales dataset.

Data Preparation

- Removed duplicate records.
- Cleaned column names and handled missing values.
- Converted Order Date to datetime and extracted Year and Month.

KPIs

- Total Revenue: Sum of Sales.
- Average Order Value: Revenue divided by unique orders.
- Profit Margin: Calculated only if Profit data is available.
- Conversion Metrics: Calculated only if visitor/conversion data is available.

Visualizations

- Monthly sales trend.
- Sales by region.
- Sales by category.
- Top 10 and bottom 10 products.
- Regional sales heatmap.
- Monthly seasonality analysis.

Key Insights

- Sales trends reveal seasonal demand patterns.
- Regional comparison highlights strongest and weakest markets.
- Product analysis identifies high- and low-performing products.
- Category analysis shows which product categories contribute the most revenue.

Five Tactical Improvements for Alfido Tech

1. Increase investment in top-performing regions through localized promotions and inventory planning.
2. Bundle complementary products to improve Average Order Value and cross-selling opportunities.
3. Reduce or redesign consistently low-performing products while focusing marketing on high-demand items.
4. Plan seasonal campaigns and stock replenishment ahead of historical peak-demand periods.
5. Build an interactive dashboard to monitor revenue, regional performance, product trends, and KPIs in real time for faster business decisions.
